ICAP LESSON: Basic Skills Survey

Grade: 10

Materials: Computer Lab
                          Worksheets

Day 1:

- Have each student log in to their College in Colorado account. They should complete the Basic Skills Survey under Career Planning -> Learn About Yourself -> Basic Skills Survey. Have students explore their results.
- Students should compare their list of suggested careers from the Basic Skills Survey and the Interest Profiler they took in 9th grade. To do this, students should go to Career Planning -> Career Finder (right side of page).
- In the Career Finder, they should use only the Interest Profiler and Basic Skills and clear the rest of the fields. When they click on SEE MATCHING CAREERS they will only see the careers where their skills overlap their interests.
- If a student does not see any careers listed that they are interested in, have them go back to their Interest Inventory career list and look up the basic skills necessary for their desired career.
- Have each student save at least one career of interest to their portfolio.
